

Sharps Disposal

"We can help you care for the health and safety of your patrons"

It can be disturbing to consider that sharps may enter your premises. Unfortunately sharps waste is part of our society today. Staff and customers can be at direct risk of injury from sharps waste.

When hazardous materials are not separated from standard waste, individuals can unknowingly come in contact with them. In addition, if sharps waste is not disposed, and removed from the environment, then it can be subject to reuse and misuse, both intentional and unintentional.

Impact Hygiene offer a sharps disposal service handled by professional trained technicians.

Collection can occur in conjunction with your optional weekly service., OR waste can be collected at a scheduled frequency to suit the requirements of your business. Impact Hygiene can discreetly and professionally dispose of sharps ensuring safe and hygienic restrooms in your establishment.

As business managers and owners it is our social responsibility to offer a safe environment for our customers and staff.

As a biohazardous material, injuries from sharps waste can pose a large public health concern. By penetrating the skin, it is possible for this waste to spread blood-borne pathogens. The spread of these pathogens is directly responsible for the transmission of blood-borne diseases, such as Hepatitis B (HBV), Hepatitis C (HCV), and HIV. Hygiene professionals expose themselves to the risk of transmission of these diseases when handling sharps waste.

Our professionally trained team will give you peace of mind that your sharps waste is disposed of safely and efficiently.

The spread of disease and injury through sharp waste is preventable through proper management and disposal.
